

# LEE COBLEY

(Hampden 1976)

Chairman of the AGS ***Inspiring Science*** campaign, Lee studied Physics, double-Maths and French at AGS, gaining a place at Bristol University to read Mechanical Engineering.

*“As a teenager, I enjoyed tinkering with engines and was keen to study an Engineering degree. Mr Hancock’s enthusiasm inspired me to get the grade in Physics I needed for a good University place.”*

*“I taught Science and Maths at secondary school before joining the Royal Air Force in 1986.”*

Lee taught Engineering Science, Leadership and Communication Skills to cohorts of RAF officers, and enjoyed a 25-year RAF career in Training Management and Human Resources.

*“I had some enjoyable tours: three and a half years in Cyprus training the Forces personnel, and 2 years in Holland supporting the Educational needs of the UK Forces.”*

*“My most challenging, but rewarding, tour was with the NATO Training Mission in Baghdad, 2007-2008, working in the Green Zone with a range of European allies.”*

*“The Science teaching at AGS provided me with the foundations for a successful career in Engineering and Training.”*
